

EXTREME NETWORKS® CORPORATE FACT SHEET

Name: Extreme Networks Inc.

Incorporated: 1996 in Delaware, USA

Stock Symbol: NASDAQ: EXTR, Listed April 13, 1999

Headquarters: 3585 Monroe Street, Santa Clara, CA 95051

Phone: 1-408-579-2800 Fax: 1-408-579-3000

About Extreme Networks

Converged network infrastructure solutions from Extreme Networks deliver powerful capabilities to solve tough networking challenges. The company's innovative open network architecture delivers meaningful insight and unprecedented control for converged networks that support voice, video and data over wired and wireless infrastructures. Extreme Networks' solutions excel at delivering availability, security, and crystal clarity under the harshest network conditions.

Business Summary

Extreme Networks of Santa Clara, California, founded in 1996, is a publicly listed company that designs, builds and installs sophisticated Ethernet solutions that meet the toughest challenges in network connectivity and IP-based communications.

Throughout its history, the Company has delivered more than 20 Million Ethernet ports and has established a presence in more than 50 countries. The Company increases the value of the network with its advanced software platforms that deliver meaningful insight and control to applications and services. This helps corporate enterprises and service providers who must have high performance, secure networks that support converged voice, video and data. Intelligence is enhanced in the network with an extensible, flexible and secure protocol-based communication capability, allowing devices to talk to one another

Extreme Networks addresses a wide range of customers with wired and wireless network

infrastructures. From corporate enterprises such as manufacturers, retailers, financial institutions, utilities and healthcare organizations, to large universities and K-12 school districts to federal and local governments.

To complement its products, Extreme Networks provides a complete selection of professional services and custom offerings, including network design, enhanced visibility into flows and applications, voice and security testing, network kit implementation as well as technical assistance on a 24x7 basis to a global footprint.

Key Facts & Industry Awards

Extreme Networks has a presence in more than 50 countries supported by 850 employees and 600 authorized partners worldwide.

InfoWorld named the BlackDiamond® 10808 and BlackDiamond 8800 series "InfoWorld's 2007 Technology of the Year" for an unprecedented three times since 2004. The InfoWorld editors stated "Setting up an advanced switching topology in what amounts to a single day is a solid achievement for any platform but Extreme Networks really nailed it. These products clicked together like well-oiled machines—so well that we were completely through our baseline testing on the very first day." This is the third annual award since 2004 given to the BlackDiamond platform, featuring the innovative ExtremeXOS® modular operating system and wire-speed 10 Gigabit Ethernet performance.

Network Magazine honored the BlackDiamond® 10808 switch and the ExtremeWare®XOS™ operating system by recognizing it with the 2005 Innovation Award for its unique approach to opening the core switch for collaboration to promote integration with third-party solutions. The solution was named the “Most Visionary” for its ability to increase intelligence and device collaboration for emerging areas such as security and IP telephony.

Frost & Sullivan honored Extreme Networks with the Product Line Strategy Award for the Enterprise Switch Market. Frost & Sullivan noted that Extreme’s products and services provide higher network availability, simplify installation and maintenance allowing customers to speed the completion of new projects. Extreme’s strong security authentication / monitoring, built-in network resiliency features and its network edge strategy, consisting of unified access architectures for voice, wired and wireless, were highlighted.

Executive Management

Mark Canepa, President and Chief Executive Officer of Extreme Networks

Karen Rogge, Senior Vice President and Chief Financial Officer

Dean Drougas, Vice President and Chief Information Officer

Paul Hooper, Vice President and Chief Marketing Officer

Robert Schlossman, Senior Vice President and General Counsel

Helmut Wilke, Senior Vice President of Worldwide Sales

Suresh Gopalakrishnan, Vice President and General Manager of Emerging Products

Douglas Murray, Vice President and General Manager of Volume Products

Frank Blohm, Vice President of Operations

Michael Gray, Vice President of Corporate Quality and Reliability

Diane Honda, Vice President and Associate General Counsel

Kathleen Swift, Vice President of Human Resources

Board of Directors

Gordon L. Stitt, Chairman of the Board, Co-founder and Former CEO of Extreme Networks

Charles Carinalli, Former VP/GM Networking, National Semiconductor, Inc.

Mark Canepa, President and CEO, Extreme Networks

Harry Silverglide, Retired Networking Technology Executive

John C. Shoemaker, Former Executive Vice President and General Manager for Sun Microsystems Computer Systems Division

Kenneth Levy, Chairman of KLA-Tencor Corp.

Robert Corey, Executive Vice President and CFO of Thor Technologies, Inc.
