

KIRK Multicharger

With the KIRK Multicharger, KIRK telecom introduces the possibility of charging 4 KIRK Handsets simultaneously. The KIRK Multicharger is very easy to install and can be either wall-mounted or placed on a desk as best fits the user. Designwise, the KIRK Multicharger is similar to the KIRK Single Charger.

Main Segments

The KIRK Multicharger is a positive addition for users in many different segments. It is however especially useful in segments where the handset is not a personal item, but instead is used by different staff members through different work schedules.

This is the case in hospitals, in special care units and in production facilities where people work in shifts.

Unique Selling Points

- Designed to fit the KIRK 4020 and the KIRK 4040
- Flexible charger: Can be wall-mounted or placed on a desk according to customer preferences
- Less wiring: With the KIRK Multicharger the number of wires surrounding the chargers is decreased- only one wire needed in order to charge 4 KIRK Handsets.
- Easy installation

Keep in mind that the KIRK Multicharger may only be used to charge KIRK 4020 and KIRK 4040. The KIRK 4080 is to be charged with the specially designed ATEX and IEC approved KIRK Single Charger.
